Attn: Elbert Yun

Dear Mr. Yun:

I wish to comment on my personal experience with the DDS Back Support and Brace System. I have used it now well over one year and have had excellent results with it. I am very pleased with its versatility, especially that it can be used as just the inflatable back support and/or with the more rigid plates for the back and abdomen. I have used it in all of its formats.

I have had long-standing back problems including stenosis, degenerative joint and disc disease as well as herniated discs and nerve root impingements. I was introduced to your back support about 2 years ago by a local product representative and have had excellent results with this support. I frequently have back pain and it interferes with my activities of daily living. Last summer, using the brace, I was able to wash and wax my son's vehicle completely and had no significant back pain either during or following that activity. Without the back support, I'm sure that I would have been almost hobbled by the back discomfort. I also appreciate that it is washable and comfortable to wear.

I compliment your company on producing such an excellent product. Being a physician, I have used it with many of my patients and have found it to be very helpful to them as well.

Thank you once again.

Respectfully yours,

JOSEPH GRASSI, M.D.
